

# Sustainability Policy Stazione Leopolda

Stazione Leopolda is a suggestive and unique location of its kind. Protected for its historical and artistic value, from a railway station in the first half of the nineteenth century it has been transformed into a meeting place for creatives and for all those who love to free their imagination, meet and make their events special. The Stazione Leopolda is therefore much more than a simple location: a multifunctional space and a real transit station for creative ideas.

From 2020 Stazione Leopolda Srl has decided to undertake a path to improve its activities and those of suppliers and customers in terms of environmental, social and economic sustainability and obtained the certification as a sustainable location for events according to the international ISO 20121 standard in September 2021. This path is connected to the evolution of Stazione Leopolda as an international reference point for anyone who wants to host their event in a unique and sustainable space and, at the same time, as a flywheel capable of generating direct and indirect economic and employment effects on the territory.

All the activities related to this space are managed by Stazione Leopolda Srl, a single-member company of Pitti Immagine Srl, the Italian company engaged globally in the promotion of the fashion industry and design; an activity that has recently also extended to the food and wine and perfume sectors.

Stazione Leopolda shares values and principles with the Pitti Immagine property such as: Innovation, Research, Independence, Competence and Internationality. To these values are added the principles of UNI ISO 20121 that Stazione Leopolda has decided to embrace starting the certification process:

1. **TRANSPARENCY:** understood as the desire to share information, concrete experiences and good practices with stakeholders on their socio-environmental objectives and results;
2. **INCLUSIVITY:** understood as the desire to listen to and involve all stakeholders in a full, meaningful and without exclusion way;
3. **INTEGRITY:** understood as the ability to keep the promises and commitments made towards all the parties involved;
4. **PROTECTION:** understood as attention to the expectations and rights of interested parties, awareness and responsibility for the impact of each single action taken.

In particular, on the sustainability front, the concrete commitment of the organizers is aimed at locally implementing the sustainable development goals defined in the 2030 Agenda by the United Nations.

**3 – Health and Well-being**

- Full physical accessibility
- Carefree enjoyment of the event
- Risk prevention and adoption of anti-pandemic safety protocols

**12 – Responsible consumption and production**

- Enhancement of the historical and cultural value of Stazione Leopolda
- Adoption of a sustainable procurement policy
- Reduction of energy and water consumption
- Reduction and proper management of waste generated

**15 – Life on Earth**

- Reduced consumption of raw materials in favor of responsible solutions such as green set-ups and dematerialization of communications

**13 – Climate Action**

- Reduction of CO<sub>2</sub> emissions generated by the location, such as: energy consumption, transport, waste, etc.

**17 – Partnerships for the goals**

- Creation of a network of qualified suppliers aligned with Stazione Leopolda's sustainability objectives.
- Involvement of customers, institutions, local community and participants to take an active part in the Sustainability Policy

The Management also undertakes to:

- continuously improve sustainability objectives;
- comply with regulatory compliance (security, accessibility, privacy, environment, etc.);
- update the Sustainability Policy annually.

5th april 2022
